

Unequal chances for societal, economic and political participation for women and men, institutional prerequisites that exclude people from participating based on their gender or sexual identity or hinder them in the realization of their life plan.

Traditional gender roles and stereotypes are barriers and hindrances for equal chances of the realization of all genders and identities.

We join the movement for the promotion of gender justice and peace with our pilgrims initiative "Go for Gender Justice – Pilgern in der Nordkirche". We have encountered troubling points along our journeys.

We ask: What can we, as the church, do, to assure the dignity and equality for people of all genders as well as overcome prejudices and stereotypes?

We are certain that we all are images of God.

Rays of hope become visible.

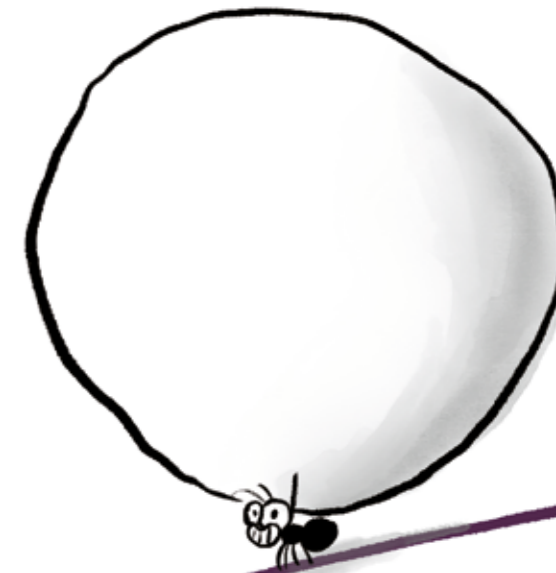

United we will be able to overcome discrimination and inequality.

**We shoulder and carry a lot.**

**How can we encourage each other?**

**And grow beyond ourselves?**

Please turn

We share our experiences in cooperation with activists from society and church and promote the realization of equality with our impulses and initiatives.

So that "righteousness and peace kiss each other." (Psalm 85, 10), we march for

- equal rights for all people,
- the overcoming of traditional gender roles and clichés,
- equal distribution of work, power and influence,
- appreciation of the multitude of genders and sexual identities
